## Links can be distinguished from surrounding text in some way other than by color

Ensures users who cannot distinguish between colors can tell when text is a link by verifying the link has either a distinct style that does not rely on color or has a contrast difference of greater than 3:1 (which alerts you that manual testing is required).

### Disabilities Affected:

### **Bridge the accessibility gaps with manual accessibility audit!**

Automated scans can identify many common accessibility violations, but some of WCAG 2.1, and 2.2 criteria can't be reliably tested with automation alone. That's the reason why we offer expert human or manual accessibility audit to fill those gaps & provide website accessibility and remediation insights.
